Quality Control

Our 1,400 sqm facility operates 16 injection molding machines (120T–380T), producing over 5 million tile leveling components monthly. Every batch undergoes three-stage quality control:

- ### 1. Incoming Material Inspection

Melt flow index testing on every PP/PE shipment. Certificates of analysis for all raw materials.
- ### 2. In-Process Dimensional Checks

±0.1mm tolerance verification during production. Digital calipers with ±0.01mm accuracy.
- ### 3. Pre-Shipment Lot Testing

Break force consistency, visual defect sorting, AQL 2.5 standard. Photos of packed goods before shipment.
